

Bloom's **Digital** Taxonomy & the **Communication** Spectrum

In Human history we have seen many different ages, the dark ages, the middle ages and more recently the space and information ages. We live in a time that might best be described as the **communication age**. We are always connected, always available and constantly communicating and collaborating across a spectrum of activities with increasing levels of complexity and creativity.

Collaboration is not a 21st Century skill, it is a 21st Century essential.
